Liliana Danielle Nasrallah

646-938-2384 | ldn29@cornell.edu
160 W 87th Street, New York, NY 10024

EDUCATION

Cornell University, College of Engineering — Ithaca, NY
Master of Engineering, Mechanical Engineering — Expected December 2026
Bachelor of Science, Mechanical Engineering — May 2026
GPA: 4.05 — Dean's List

University of Edinburgh — Edinburgh, Scotland
Study Abroad Semester — January 2025-May 2025

Related Courses: MATLAB, Statics and Mechanics of Solids, Thermodynamics, Mechanical Synthesis, Fluid Mechanics, Mechanics of Materials, System Dynamics, Statistics, Wind Energy, Heat Transfer, Space Structures, Energy Seminar

JOB EXPERIENCE

Learning Studios Internship — June 2024-August 2024
Cornell University — Ithaca, NY
- Partnered with the Glenn H. Curtiss Museum to generate virtual reality app which allows museum visitors to interact with the engines without damaging them
- Disassembled and reassembled several engines to gain a better understanding of the working components
- Designed and built a custom engine stand to more easily disassemble the Curtiss OX-5 engine
- Rendered individual engine components in Fusion360 to generate a full scale 3D model of the OX-5 engine

Teaching Assistant — August 2024-December 2025
Cornell University — Ithaca, NY
- Advised 200+ students by leading recitation and lab sections for MAE 2020: Statics and Mechanics of Solids (Fall 2024) and MAE 2210: Thermodynamics (Fall 2025)
- Led office hours to individually support students in a wide variety of course topics

PROJECT EXPERIENCE

Engineers for a Sustainable World — February 2023-December 2024
Cornell University — Ithaca, NY
- Collaborated with 30 people to reduce Cornell's carbon footprint on the Carbon Neutrality sub team
- Designed a renovation of Cornell's Biomass Grinder Facility using knowledge of thermodynamics and heat exchangers
- Analyzed data in Python to improve the sustainability of old lighting systems in Cornell buildings
- Presented projects to fellow students and faculty during conferences and design reviews

ZT Research Group: Nano Heat Energy — June 2024-August 2024
Cornell University — Ithaca, NY
- Collaborated with a team of 20 people to build a solar powered oven which simultaneously generates electricity
- Modeled the lens holder in Fusion360 to 3D print and prototype components

Blade Leading Edge Erosion — September 2025-December 2025
Cornell University — Ithaca, NY
- Conducted research to reduce power losses caused by leading edge erosion of wind turbine blades
- Utilized the SALT model in Excel to evaluate performance of damaged blades
- Conducted CFD simulations in Ansys Fluent to predict the power generation of wind turbines

EXTRACURICULAR ACTIVITIES

Cornell Ultimate Frisbee — Ithaca, NY
Thorny Roses Member — February 2023-Present
- Work on team building and cooperation attending biweekly track and disc practices
- Compete in several tournaments each semester in the Northeast region

SKILLS AND INTERESTS

- **Software:** Fusion360, ANSYS Fluent, ANSYS Workbench, Ashes, MATLAB, Python, RStudio, Microsoft Excel
- **Technical:** Machining (mill and lathe), Laser Cutting, 3D printing, Prototyping
- **Hobbies:** Visual Art, Jigsaw and Sudoku Puzzles, Knitting, Crocheting, Photography, Printmaking, Beading
